

Attention all pupils in Year 2 to 5

Would you like to develop your engineering skills and design future technology?

Amazon have launched a competition for children in Year 2 -5 to design their dream delivery drone.

Information about the competition can be found at: <http://designadrone.uk/>

Students are being asked to design their dream delivery drone, including what it looks like, what it would deliver and why. The competition aims to raise awareness of how to fly drones safely and the potential benefits of the technology. There are 12 regional heats and a national final. You will be entering in the East of England region.

Prizes will go to three winners in each region:

- The first place regional winners of the competition will be awarded a Fire tablet, a gift basket valued at around £200 and a cash donation of £1,000 to the school that they attend, to be spent on in-school resources for the teaching of science, technology, maths and engineering.
- Two runners up within each region will each be awarded a gift basket valued at around £50.

A single national winner will be selected from among the 12 regional winners, and in addition to their regional prize, the national winner will have the opportunity to travel to the Amazon Prime Air Lab in Cambridge, UK (together with five friends and three adult chaperones), where their design will be exhibited for a year.

How to enter

- Visit www.designadrone.uk for more information, to view the contest's terms and conditions, and to download entry forms

Key dates

- Competition closes: Friday 2nd June
- Winners announced: Regional winners by Monday 26th June and national winner by Friday 30th June
