Primary Mathematics Challenge

Last week a large number of pupils in Year 6 took part in the National Primary Mathematics Challenge. This is a fun and exciting mathematical challenge aimed at pupils across the United Kingdom.

The PMC paper has 25 questions, 20 of which are multiple choice. The questions are graded; starting with easy ones and graduating to harder questions. The final five require an answer where no choices are given. An example of the kind of questions that the pupils faced can be found at http://www.primarymathschallenge.org.uk/ .

I am delighted to say that 27 pupils have been awarded a certificate, with three of them getting a Gold award, namely Ava Birmingham, Elizabeth Hutton and Ewan Smith, and we wait to here from the organisers as to whether they are to be invited to take part in the next round in February.

Well done to all those who took part.
