

Year 6 Mathematics Challenge

On Thursday, Ashburton Hall buzzed with the energy and enjoyment of 110 young mathematicians involved in an afternoon of mathematical mayhem and fun. For the 16th year running we hosted the Year 6 Cambridge Maths Challenge, a team challenge open to all local schools and we had over 20 schools present, as well as almost 40 adult helpers and supporters. The students were engaged in a number of tasks such as a version of countdown and a relay problem solving round, and it was marvellous to see the commitment and enthusiasm shown for the subject. It was not to be our year this year, with Pendragon School taking top spot but St Faith's was ably represented by Elizabeth Hutton, Emily Young, Ewan Smith, Noah Morrison, George Clarke, Ava Birmingham, Vivian Kavadia and Alex Williams. If anyone wants to try out some of the tasks then they are available on via the following link
