

FAQs

A common question that we receive from parents is “What topics will my son/daughter study this term/year?” This question is often subject specific and can arise either out of curiosity for the year ahead or to aid revision for any tests that older pupils may sit at different stages throughout the academic year.

For Years 3 – 8, a good source of reference is the [Curriculum section](#) on our school website. Choose the ‘Curriculum’ tab from the drop down selection at the top of your homepage and here you will find the Long Term Plans for each subject in Years 3 to 8 (alongside a homework timetable, so that you can be aware of what subject work that your child should have on each evening). Pupils are also aware that there are additional resources available to aid their study that can be found on our Virtual Learning Environment (VLE) and which all pupils have their own login and password for.

Pre Prep parents may find it useful to view the [termly topic overview maps](#).

I trust that many parents will find these documents to be a useful source to reference.
