

Raspberry Pi World Record Attempt

At St Faith's, we have recently upgraded the Raspberry Pi computers that we use in Computing lessons. We are going to recycle our old Pis by sending them to Picycle (<https://picycle.org>) and be part of the world record attempt for the world's largest Raspberry Pi cluster (a load of Pis all networked together). If you have any unwanted Raspberry Pis at home and want to help with this, please bring them to Mr Mitchell before the end of term.
