

Foundation

The 'Move Up' morning on Thursday was very exciting. The children explored their new classrooms and returned to Foundation later in the morning excited and feeling particularly grown-up! We hope that you were able to meet your child's Year 1 teacher on the afternoon of 20th June.

For the rest of the week the children have been working as normal. They have been writing a traditional story, carrying out a pollution survey and using paint programs on the computer to draw an animal. We also loved FLW's assembly and the re-telling of the story of The Enormous Turnip. We got to see how much the children have grown over the year – 7cm was about the average!

In Maths this week, the children have focusing on measuring. They have been measuring mass and length using non-standard units.

For homework, we would like the children to think about this problem. Show the children the picture and tell them: These drawings were found in La Pileta cave, in Spain and could be up to 25000 years old.

Ask them:

- What do you think these drawings represent?
- Could they be about counting things?
- What might 'stone-age' people count?
- Might they be the earliest known number patterns?
- Could you try and make up your own way of recording counting?

Next week, Wednesday 26th June sees FCH's class assembly and on Friday 28th June, the Foundation children will have another opportunity to spend some more time in their Year 1 classrooms.

Best wishes,
The Foundation Team
