

Maths Kangaroo Results

Earlier in the term, over one hundred of our most able mathematicians in Years 6 , 7 and 8 took part in the Junior Mathematics Challenge, along with 272 000 other pupils nationally. The top nine thousand were invited to take part in a follow up round. The best 1000 took the Junior Mathematical Olympiad paper, and we have just heard that Juliette B was awarded a merit, a fantastic result. William M, Constanze T, Daniel M, Harry TB and Theo W took part in the Kangaroo paper and the results are also in for them and they all did very well, with Theo, Harry and Daniel scoring in the top 25% and so achieving a merit award.

Well done to all of them.

Mr Kite
