

Year 6 Science

This week, Year 6 have been making model cells using items from their home to photograph and share via Teams. Today, 6F presented their marvellous creations with their class mates. From cakes to dried fruit, lentils, pasta and gelatine to curled paper, pencil grips, marbles and pompoms, they were all so unique and resourceful. I hope Year 6 enjoyed this task as much as we enjoyed seeing pictures of the finished results. Here are some examples.
