

## Foundation

The week, the children have been imagining what might lie beyond a magic door if they were to journey there. They have been writing about and drawing their imaginary lands. We had rides on dinosaurs, were swept down rivers and visited sweetie lands!

In Maths this week, we have been looking at how to write maths sentences using the symbols + - and =. For homework, help your child solve the following problem:

The robot is on 2.  
You roll a 1 to 6 dice.  
After 2 moves it lands on 8.

Find all the different ways the robot can do this.

Can you record your moves as maths sentences?

Although we can't quite believe we are at this point of the year, there are a number of events next week to let you know about: On Thursday it will be your child's turn to meet their new classmates and teacher for our Move up Day! Friday sees our 'Fun Day' where children are welcome to wear home clothes suitable for physical activities.

We will also be carrying on with work, thinking about our journey in Foundation!

Best wishes,  
The Foundation Team
