

## What do we want the outcome to be for every child at St Faith's in regards to Eco and Sustainability?

**Our vision is for every child to see sustainability as inherent to being their 'best self'. Therefore, we have tailored our sustainability programme and ethos around our Learning Habits, in order to weave it intricately into our pupil's overall education.**

We encourage our pupils to become **ambitious** Green Leaders, driving meaningful change in their communities and beyond.

We inspire our pupils to embrace **creativity** and ingenuity, developing imaginative, innovative solutions to sustainability challenges.

We encourage our pupils to embrace teamwork and shared goals, **collaborating** to tackle environmental challenges with diverse ideas and collective action.

We empower our pupils to practice initiative and **independence** in sustainability, fostering critical thinking and ownership to drive their own solutions and advocate for change.

We encourage our pupils to be **reflective** in their sustainability efforts, critically evaluating their actions and seeking continuous improvement for a greater environmental impact.

We inspire our pupils to approach sustainability with **curiosity**, encouraging them to explore, question, and engage in hands-on learning to uncover innovative solutions.

We encourage our pupils to be attentive **listeners**, engaging with diverse perspectives to deepen their understanding of environmental challenges and solutions.
