

Reception News

Dear families,

Thank you to those who joined our Phonics drop-in on Monday – the notes and presentation will be shared on MySchoolPortal shortly.

In Maths we have looked at size, mass and capacity, enjoying lots of practical activities to help us begin to understand these measures. To continue this work, we would like the children to explore the challenge below.

Compare Capacity

Let's explore capacity!

Choose a container. How many jugs of water are needed to fill it up to the top?

Can you find a container that holds more/less water?

Is there more than one answer?

Do any containers hold the same amount of water?

To extend and deepen their understanding, you may like to use the following questions as prompts.

- What do you notice about these containers?
- Can you fill a container to the top?
- Are any containers empty?
- How many jugs of water do you need to fill this container?
- Which container holds the most/least water?
- How can we check?
- Can you find a container that holds more/less water than this one?

Please share their investigations via Seesaw.

As another Friday rolls round, you will also find the next set of flashcards in your child's red wallet – **i n m d**. The next articulation clip from Miss Harder will be available on Seesaw this afternoon.

Today the children have also brought home a wordless story book, there is an accompanying guide with some top tips to guide you as you share the book on Seesaw. For those of you who use Instagram, you may like to follow [Five Minute Mum](#) – this week she has been speaking about the benefits of Wordless Reading books, sharing tips and ideas. You may also find the following website useful: [Words for Life](#)

Next week we look forward to welcoming grown-ups to join us in our Library for our 'Books and Biscuits' sessions – RCAH on Wednesday and RVH on Friday, both at 14:45.

With best wishes for a lovely weekend,

The Reception Team
